

# South Jordan, Utah Communication Plan

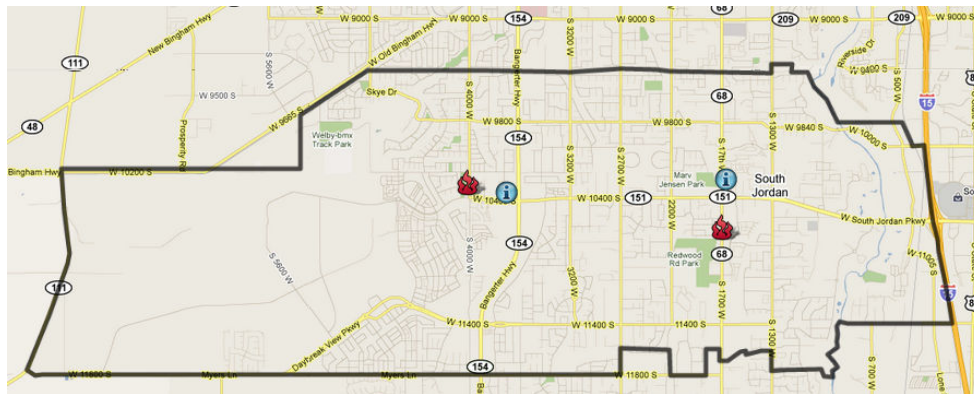

Frequencies:

Type	Receive	Transmit	Tone
Repeater	447.900	442.900	114.8
Simplex	446.100	446.100	N/A

The City of South Jordan also owns and operates a standalone commercial 800 MHz radio system. Operators can expect to be active on this system using city issued radios.

Location:

South Jordan City is located in the South West section of Salt Lake County and stretches from I-15 on the East to U-111 on the West and 9400 South on the North to 11800 South on the South.

Staging Areas:

There are two primary staging areas for the City, one located on the East side and one located on the West side. Those entering the city from the East side of the city should stage at the East Staging Area, while those entering from the West should stage in the West Staging Area.

**East Staging Area**

Smiths Parking Lot  
 South Jordan Parkway (10400 South) & Redwood Road (1700 West)  
 40 33.80N 111 56.28W

**West Staging Area**

Albertsons Parking Lot  
 South Jordan Parkway (10400 South) & Bangerter Highway (3600 West)  
 40 33.67N 111 58.77W

Response:

Operators should be prepared to work within a suburb community and should be self sustainable for 24 hours. It is anticipated that basic needs (Food, Water, Shelter, Restrooms) will be available but depending on the nature of the incident the services might be limited or delayed.
